

Glossy Lip Balm (LB-2)

This lip balm has been specially formulated to melt slightly on contact with skin. **SeraSoft® SW 73** has a melting point of 40°C and is a superior emollient. Both SeraSoft® SW 73 and SeraSense® SF PTM have high refractive indices, resulting in glossy lips. **SeraSense® SF CPM** offers a super-light feel and excellent compatibility with natural oils.

Raw Material/INCI Name	% w/w	Trade name/Supplier	Function

Typical Properties

Appearance:	Pale yellow solid
Viscosity @ 25°C:	n/a
pH @ 25°C:	n/a

Method

Blend the ingredients of Phase A by heating to 40 – 50°C.

In a separate vessel, mix the ingredients on Phase B. Add to Phase A whilst still soft and stir until homogenous.

Pour into jars whilst still warm and allow to set.
