

Quick Dry Nail & Cuticle Oil (NC-1)

This formulation is quick drying thanks to the addition of the highly volatile SeraSense® SF 2 (Dimethicone). SeraSense® GB 11 (Cyclopentasiloxane (and) Dimethicone) thickens the formulation to a consistency which allows it to spread over the nail without it being too runny. SeraSense® SF PTM (Phenyl Trimethicone) adds shine.

Raw Material/INCI Name	% w/w	Trade name/Supplier	Function
Dimethicone	45.70	SeraSense® SF 2/KCC Beauty	Quick Drying
